

### FEATURES:

- ✔ *Designed to duplicate the signal of existing gate remote operating at a frequency of 433 MHz*
- ✔ *Typically involves a simple process of clearing the memory and then copying the signal from the original remote*
- ✔ *Works with various type of auto gate system excluding those with 8-pin DIP switches*
- ✔ *Features a circular button layout with different colored section and a keyring*
- ✔ *Pressing button on the copied remote activates the gate, functioning identically to the original remote*
- ✔ *To copy, users press button on both the new and original remotes simultaneously until an LED indicator flashed, signaling successful cloning*
- ✔ *It is crucial to ensure the remote is compatible with the existing system, particularly regarding the frequency and coding type*
